Consultant Elimination of Mercury

Elimination of Mercury

Under the direct supervision of the UN Environment/MAP Deputy Coordinator in consultation with the GEF project manager responsible for the overall preparation of the MedProgramme, the consultant will be responsible for the following overall tasks:

1. Provide guidance to countries on screening, inventorying, collecting, packaging, transfer, and handling of Mercury with local consultants;
2. Contribute to the completion of the Mercury inventory including location of stockpiles as well as disposal plans and their estimated cost with local consultants;
3. Help finalize the Mercury inventory with the data provided by countries with local consultants;
4. Make economic scenarios on the concrete activities describing the cost of disposal;
5. Prepare and provide inputs for UN Environment/MAP bodies reporting and for communication purposes and prepare progress reports on timely manner.

Expected outputs

1. Guidance and format for preparing inventory of Mercury completed, when appropriate, with the consultant recruited by the implementing agency and local consultants (Task 1);
2. Assessment of Mercury stockpiles; designate their locations and prepare disposal plans with cost estimation of Mercury prepared (Task 2);
3. Support inventory of 30 tons of mercury completed (Task 3);
4. Concrete activities for disposal prepared and their cost estimated (Task 4);
5. Support the development of a report on the baseline scenario (current status) and alternative scenario (list of specific activities under the MedProgramme) on the Elimination of Mercury per country (Task 5).
